Summary

With about 2 years of experience, I've developed a strong expertise in building responsive and user-friendly web applications as a frontend engineer. I've successfully collaborated with cross-functional teams to design and develop UI components, build reactive client-side applications, and implement accessible and semantic HTML structures. Proficient in utilizing popular frameworks like React. I've effectively integrated RESTful APIs and third-party libraries to enhance application functionality, ensuring cross-browser compatibility and optimizing performance. Throughout my projects, I've worked closely with designers to translate designs into functional UI components, leveraging tools like Chrome DevTools and Jest for debugging and testing.

Experience

Cholatrek

Frontend Developer Intern

July 2022

Akure, Nigeria

During my internship at Cholatrek, I gained valuable experience in frontend development, contributing to the development of responsive and user-friendly web applications. I worked closely with the team to design and develop UI components, implementing accessible and semantic HTML structures and leveraging frameworks like React and CSS frameworks like Bootstrap. I successfully integrated RESTful APIs and third-party libraries to enhance application functionality, ensuring cross-browser compatibility and optimizing performance. Through this internship, I refined my skills in debugging and testing with Chrome DevTools and Jest, and collaborated effectively with designers to translate designs into functional UI components. Overall, my experience at Cholatrek helped me grow as a frontend developer, and I'm excited to apply my skills and knowledge in future projects.

DevHoda

Frontend Developer Tutor

May 2024 - Present

Abuja,Nigeria

As a frontend developer tutor at DevHoda Institute, I effectively taught and mentored students in frontend development, guiding them in building responsive and user-friendly web applications. I developed and implemented engaging lesson plans, covering topics such as HTML, CSS, JavaScript, and popular frameworks like React.I provided individualized support and feedback, helping students overcome challenges and improve their coding skills. Through interactive sessions and hands-on exercises, I empowered students to develop a strong foundation in frontend development and prepare for industry careers. My teaching experience at DevHoda Institute not only enhanced my technical expertise but also honed my ability to communicate complex concepts clearly and inspire students to achieve their full potential.

Education

Cholatrek Institue

Frontend Development

January 2022 - June 2022

Federal University Oye Ekiti

Pharmacy

October 2022 - Present

Doctorate's degree

Projects

Pneuma life church

September 2022

🔗 <https://netlify-thinks-michealmata2003-is-great.netlify.app/>

The project is a prototype of a web-based admin dashboard built using React JS, providing a user-friendly interface for managing and monitoring various administrative tasks and data. The dashboard offers a range of features and functionalities, including data visualization, user management, and analytics, all designed to streamline administrative workflows.

Oga Visa

🔗 <https://www.ogavisa.co/>

Ogavisa is a cutting-edge web application built using React, developed in collaboration with a team of developers. Your contribution to this project showcases your ability to work effectively in a team environment, bringing expertise and skills to the table to deliver a high-quality web application. The live project demonstrates a robust and scalable platform, offering a seamless user experience.
